SKILLS SUMMARY

- Languages: Python, Java, C, JavaScript, SQL
- Frameworks: React.js, , FastAPI, TensorFlow, PyTorch, Scikit-Learn, OpenCV, Pandas, Tailwind CSS, Bootstrap.
- Tools: Git, GitHub, Docker, Power BI, MySQL, MongoDB, Firebase, Render, Vercel .
- Platforms: Visual Studio Code, Jupyter Notebook, PyCharm .
- Soft Skills: Problem Solving, Team Collaboration, Communication, Stakeholder Management, Leadership.

SUMMARY

I am an enthusiastic Artificial Intelligence & Machine Learning undergraduate skilled in Python, Java, full stack web development, and machine learning. I have hands-on experience building AI-powered applications, REST APIs, and scalable web solutions using modern technologies, demonstrating strong teamwork and practical problem-solving. I am passionate about solving real-world problems through AI, computer vision, and data-driven approaches, and I am always eager to learn, adapt, and grow in a fast-changing technological environment..

PROJECTS

**AI-Powered Resume Analyzer** *(completed)*

**React.js, Node.js, Express.js, SQLite, Gemini API**

- AI-powered resume analysis with ATS score generation, identifying missing skills and keywords.
- Provides personalized resume optimization using the Gemini API with a responsive real-time dashboard.

**Real-Time Vehicle Speed Detection & Accident Prediction** *(completed)*

**Python, OpenCV, YOLO, FastAPI**

- Detects vehicle speed in real time using computer vision and predicts accident probability using ML models.
- Sends emergency alerts for high-risk situations and stores vehicle tracking and incident reports.

**AI Desktop Assistant (Anything AI)** *(completed)*

**React.js, Electron.js, Node.js, Express.js, SQLite, Gemini API**

- AI-powered desktop assistant with natural language interaction, smart command execution, and website launching.
- Summarizes PDFs, manages notes, and supports screenshot capture for local AI-based productivity.

CERTIFICATES

- **Data Analytics using Python — NPTEL**
- **Machine Learning with Python — Placemantra**

ACHIEVEMENTS

- Machine Learning Intern – Placemantra.
- Participated in META Hackathon 2026.
- Developed multiple AI-powered Full Stack applications.
- Built Computer Vision and Deep Learning projects.
- Active contributor to GitHub AI/ML projects.

LANGUAGES

- English , Kannada , Hindi , Telugu
